**Competition javelins  
CARBON PREMIUM LINE**

They are the essence of our experience lasting decades in the production of the throwing implements. The application of extremely durable carbon fibres and special resins increases vastly the javelin rigidity which lessens vibrations during flight and allows for farther throws.

**Only now! They are offered with 55% discount for the 55<sup>th</sup> birthday!**

**Training javelins  
CARBON PREMIUM LINE**

The carbon fibres are also used in the training javelin line. Thanks to that an athlete preparing to a competition gets, at a reasonable price, the training javelin whose rigidity is unreachable in implements manufactured with the standard technology.
